One-Liner Strategy

For every scheme in the exam: (1) Year, (2) Ministry, (3) Objective (one line), (4) One key feature, (5) Beneficiary statistics. This five-point format fits perfectly in a 150-word GS2/GS3 answer. Focus on the top 30 most important schemes.

Answer Integration

Don't just list schemes — group them by approach. Example: "For farmer welfare, the government has taken a three-pronged approach — income support (PM-KISAN), risk mitigation (PMFBY, PM-AASHA), and resource enhancement (PMKSY, PKVY, MIDH)." This shows analytical thinking.

Common Mistake

Many confuse schemes across ministries: PM-KISAN is Agriculture (not Finance), PMAY-U is Housing & Urban Affairs (not Rural Development), PM-KUSUM is Power Ministry (not Agriculture). Ministry attribution is a common exam question.
